CONTENTS

NO. 1, MARCH 1961

Physiological and pharmacological aspects of the control of hunger and thirst. BENGT ANDERSSON AND STIG LARSSON ................................................................. 1
Supersensitivity following “pharmacological denervation.” N. EMMELIN ..................... 17
Sugar transport in the red blood cell: structure-activity relationships in substrates and antagonists. PAUL G. LEFEVRE ......................................................... 39
The actions of substances introduced into the cerebrospinal fluid and the problem of intracranial chemoreceptors. HANS WINTERSTEIN ............................................ 71

NO. 2, JUNE 1961

The concept of carrier transport and its corollaries in pharmacology. WALTHER WILBRANDT AND THOMAS ROSENBERG .......................................................... 109
The general pharmacology of the heavy metals. H. PASSOW, A. ROTHESTIN AND T. W. CLARKEON ......................................................... 185
Neurohypophysial hormones. WILBUR H. SAWYER .................................................. 225
Anticoagulant therapy. G. I. C. INGRAM ................................................................. 279

NO. 3, SEPTEMBER 1961

Hepatic and extrahepatic regulation of corticosteroids. DAVID L. BERLINER AND THOMAS F. DOUGHERTY ................................................................. 329
Physiology and pharmacology of temperature regulation. CURT VON EULER .............. 361
5-Hydroxytryptamine antagonists. LASELO GYERMEK ............................................. 399
Absorption of drugs from subcutaneous connective tissue. JENS SCHOU ...................... 441

NO. 4, DECEMBER 1961

Chemistry and pharmacology of muscarine, muscarone, and some related compounds. PETER G. WASER ................................................................. 465
Physiological basis for the action of newer diuretic agents. KARL H. BETER AND JOHN E. BARR ................................................................. 517
