FOREWORD

The first Catecholamine Symposium was held at the National Institutes of Health, Bethesda, Maryland, October 16 to 18, 1958. That symposium (Pharmacol. Rev. 11: 241-566, 1959) summarized information and ideas in this field up to 1958 and stimulated many scientists in their subsequent researches. The decision to hold a Second Catecholamine Symposium was made in April 1964, and an Organizing Committee was created, composed of J. Axelrod, B. B. Brodie, C. A. Chidsey, E. Costa, J. R. Crout, D. H. Efron, N. J. Giarman, M. Goldstein, S. Kaufman, S. Kety, I. J. Kopin, C. C. Porter, F. E. Shideman, P. A. Shore, A. Sjoerdsma, S. Spector, D. Steinberg, C. Stone, E. W. Sutherland, and H. Weil-Malherbe, with S. Udenfriend as Chairman. This committee was responsible for arranging the scientific program and made the decision to hold the symposium in Europe. The gracious offer of Prof. S. Garattini to use the facilities of the Istituto di Ricerche Farmacologiche “Mario Negri” in Milano, Italy, was accepted and the Symposium was held at that institute July 4 to 9, 1965. Prof. S. Garattini and his associate, Prof. A. Leonardi, were responsible for creating an environment most conducive to the presentation and exchange of scientific ideas.

Participation in the Symposium did not impose upon the contributors strict uniformity in presentation, order of material, or nomenclature. Accordingly, for purposes of publication these diversities remain. Special problems raised by variations in the names of compounds, of techniques and of apparatus will be evident. Differences in nomenclature, indeed, still may emphasize an ever-present need within the medical sciences for continued efforts toward a common usage. In accordance with the policy of Pharmacological Reviews, the editors have attempted to follow either of two canons of spelling and nomenclature, the British and the American, according to the author's preference. A reporter was assigned to each session to provide an account of the comments made during the discussion period, including his own editorial observations on the proceedings at that session.

The following deserve thanks for their trouble and care in participating in the editorial process: Charles Chidsey, Erminio Costa, Robert F. Furchgott, Seymour Kety, George B. Koelle, Neil C. Moran, and J. R. Vane.
