CONTENTS

No. 1, March 1973
Biochemical Formation and Pharmacological, Toxicological, and Pathological Properties of Hydroxylamines and Hydroxamic Acids. JOHN H. WEISSBURGER AND ELIZABETH K. WEISSBURGER ................................................................. 1
Biochemical Aspects of Drug and Hormone Action on Adipose Tissue. JOHN N. FAIN ........................................................................................................... 67
Parasympathetic Control of the Heart. CHARLES B. HIGGINS, STEPHEN F. VATNER AND EUGENE BRAUNWALD ................................................................. 119
Corrigendum .................................................................................................. 156

No. 2, June 1973
NEW YORK HEART ASSOCIATION SYMPOSIUM ON IMMUNOPHARMACOLOGY
Introduction. BERT N. LA DU ....................................................................... 157
Dedication. ROSALYN S. YALOW .................................................................. 159

Background—Theoretical and Practical

ROSALYN S. YALOW, PH.D., Chairman
Radioimmunoassay Methodology: Application to Problems of Heterogeneity of Peptide Hormones. ROSALYN S. YALOW ............................................................. 101
Gonadotropin-Steroid Interrelationships. R. L. Vande Wiele and I. Dyrenfurth ........................................................................................................... 189
Report on the Discussion of the First Session. SEYMOUR M. GLICK ............. 209

Cardiovascular Applications

EDGAR HABER, M.D., Chairman
The Role of Antibodies and Physiological Receptors in Cardiovascular Diagnosis, Therapy, and Research. EDGAR HABER ......................................................... 215

Digitalis
Clinical Value of the Radioimmunoassay of the Digitalis Glycosides. THOMAS W. SMITH and EDGAR HABER ........................................................................... 219
Bioavailability of Digoxin Tablets. JOHN LANDENBAUM ................................ 229
Reversal of the Pharmacological and Toxic Effects of Cardiac Glycosides by Specific Antibodies. VINCENT P. BUTLER, JR., JOHN F. WATSON, DONALD H. SCHMIDT, JERRY D. GARDNER, WILLIAM J. MANDEL AND C. LYNN SKELTON .................. 239

Renin and Aldosterone
Measurements of Renin-Angiotensin-Aldosterone. KNUD POUHLSEN ........... 249

Catecholamines
Isolated beta-Adrenergic Binding Sites: a Potential Assay Vehicle for Catecholamines. ROBERT J. LEFKOWITZ ........................................................................... 259
Report on the Discussion of the Second Session. EDWARD C. FRANKLIN ........ 269

Pharmacological Applications

SYDNEY SPECTOR, PH.D., Chairman
Principles and Methods for the Preparation of Drug Protein Conjugates for Immunological Studies. BERNARD F. ERLANGER ............................................ 271
CONTENTS

Antibodies to Morphine, Barbiturates, and Serotonin. SYDNEY SPECTOR, BARRY BERKOWITZ, EDWARD J. FLYNN AND BERNARD FERKAB ........................................... 281
Antibodies to Pharmacologically Active Molecules: Specificities and Some Applications of Antiprostaglandins. LAWRENCE LEVINE ............................................. 293
Radioimmunoassay for the Cyclic Nucleotides. ALTON L. STEINER ......................................... 309
Report on the Discussion of the Third Session. EDWARD BRESNICK ......................................... 315

Other Applications

CHARLES W. PARKER, M.D., Chairman
Manipulation of the Immune Response. GREGORY W. SISKIND ........................................... 319
The Immunotherapy of Cancer. CHARLES W. PARKER .......................................................... 325
The Use of Antibodies to Study Cell Structure and Metabolism. FLOYD E. BLOOM, H. JAMES WEDNER AND CHARLES W. PARKER ........................................... 343
Report on the Discussion of the Fourth Session. PAUL CALABRESI ......................................... 359
Subject Index ......................................................................................................................... 363

No. 3, September 1973

The Actions of Drugs on the Smooth Muscle of the Capsule and Blood Vessels of the Spleen. B. N. DAVIES AND P. G. WITHERINGTON ......................................................... 373
Effects of Angiotensin on the Central Nervous System. WALTER B. SEVERS AND ANNE E. DANIELS-SEVERS ................................................................. 415

No. 4, December 1973

Metabolism of Foreign Compounds by Gastrointestinal Microorganisms. RONALD R. SCHELINE ........................................................................................................ 451

Index ........................................................................................................................................ 525
