PHARMACOLOGICAL REVIEWS

Volume 27

1975

- Acylphosphate, competition with cardiac glycoside for water in dehydrated environment, 49**
- Adenosine triphosphatase**
sodium-potassium
adrenal steroids, effects, 82
ammonium sulfate fraction, 28
antibodies affecting, 106
chlorpromazine effects on, 76
digitalis receptor, 85
diphenylhydantoin (DPH) effects, 72
dimethylsulfoxide (DMSO) effects, 78
ethacrynic acid effects, 69
ethanol effects, 79
fusidic acid effects, 77
glycoside interaction, 42
heart, effect of K⁺ on ouabain activity, 51
hydroxylamine effects on, 74
inhibition *in situ*, 85
localization, 7
modifiers (table), 86-88
modifying agents, 68
oligomycin effects, 73
pharmacological, physiological and biochemical aspects, 3
phlorizin effects, 79
proteins from, characterization (table), 17
purification, from heart and other tissues, 8
reactive states of the sodium pump and, 35
relationship with adenylate cyclase, 111
stimulation of, 84
visualization by freeze etch electron microscopy, 26
mercurial diuretics, effect, 68
purification, successive steps, 21, 22, 23, 24
sulfhydryl reagents, effects, 80
suramin effects, 82
transport of ions and organic substrates, 245
- S-Adenosylhomocysteine, COMT inhibitor, 173, 172**
- Adenylate cyclase, relationship with Na⁺, K⁺-ATPase, 111**
- Adrenal steroids, effect on Na⁺, K⁺-ATPase, 82**
- Affective disorders, COMT in, 188**
- Age, relationship with catechol-O-methyl transferase, 157**
- Alcoholism model**
from dependence method to (animal), 459
requirements for (animal), 457
- Allen, Julius C. See Schwartz et al., 3**
- Amino acid**
hormone effects on uptake and distribution in uterine tissue, 254
testosterone influence on transport in male accessory reproductive organs, 256
- Androgens, cellular transport of, 264**
- Apomorphine, COMT inhibitor, 168**
- L-Ascorbic acid, COMT inhibitor, 174, 172**
- Behavior**
control of
by consequent drug injections, 301
by scheduled drug injections, characteristics, 307, 310
drug-taking. *See* Drug-taking behavior
environmental control, drug effects and, 429
factors in human drug abuse, 499
stimuli associated with drug injections as events that control, 325
- Bigelow, George, Roland Griffiths and Ira Liebson. Experimental human drug self-administration: Methodology and application to the study of sedative abuse, 523**
- Blood, ethanol elevation in, relation to physical dependence, 451**
- Blood flow**
hormone control of
female, 318
male, 219
increased, relation to growth, 228
- Blood pressure, measurement during conditioned withdrawal from narcotics, 538**
- Brady, Joseph V. See Griffiths et al., 357**
- Capillary permeability, hormone effect on, 219**
- Catania, A. Charles. Drug effects and concurrent performances, 385**
- Catechol, COMT inhibitor, 163, 164, 165**
- Catecholamine(s)**
COMT in assay of, 142
metabolism in peripheral systems, O-methylation and, 174
O-methylation of, in central nervous system, 184, 185
- Catechol-O-methyl transferase**
activity, principles for determination of, 138
affective disorders, 188

- Catechol-O-methyl transferase—continued
- antibodies to, 148
 - catecholamine determinations, use in, 142
 - catechol-forming enzymes, study, 142
 - clinical aspects, 188
 - different forms of, 147
 - distribution
 - animals, 148 (table), 149, 150
 - cellular, 153
 - invertebrates, 148, (table), 149, 150
 - plants, 148, (table), 149, 150
 - regional, in mammalian CNS (table), 154
 - subcellular, 156
 - tissue, in mammals, (table), 151-153
 - vertebrates, 150, (table), 149, 150
 - L-dopa, clinical use, and, 191
 - enzyme preparations, 139
 - function, in central nervous system, 187, 189
 - hypertensive disease and, 192
 - inhibitors
 - S-adenosylhomocysteine, 173, 172
 - apomorphine, 168
 - L-ascorbic acid, 174, 172
 - catechols, 163, 164, 165
 - 7,8-dihydroxychlorpromazine, 169
 - dopa, 167
 - flavonoids, 166
 - gallic acid, 162
 - hydrazine derivatives, 168
 - 2-hydroxylated oestrogens, 168
 - 8-hydroxyquinolines, 171, 172
 - iodide, 174
 - iodophenol derivatives, 172, 172
 - isoprenaline, 168
 - ketone analogues, 166
 - K_i values (table), 159
 - 3-mercaptotyramine, 173, 172
 - methylspinzarin, 167
 - nordihydroguaiaretic acid, 166
 - papaveroline, 168
 - pharmacological properties, 158
 - pyridones, 174
 - pyridoxal-5'-phosphate, 173, 172
 - pyrogallol, 158, 159
 - pyrones, 174
 - sulphydryl binding agents, 174
 - tropolones, 169, 169
 - U-0521, 166
 - isomers, *m*- and *p*-methylation, enzyme/substrate interactions, 142
 - kinetics of, 144
 - molecular weight of, 146
 - noradrenaline concentrations, regulation in sympathetic nervous system, 180
 - pharmacological aspects, 135
 - physiological role, 135
 - purified, 146
 - radioassay techniques for measurement of activity, 139
 - reactions, characteristics of, 142
 - relationship with age, 157
 - substrate specificity, 142
 - tumors and, 192
 - uterine activity, 158
- Cell membrane, structure, 4
- Cellular structure, relation to control of cellular transport and tissue distribution of molecules, 230
- Central nervous system
- COMT distribution in animals, 150
 - COMT function in, 187, 189
 - O-methylation of catecholamines in, 184, 185
- Chlorpromazine effects on Na⁺, K⁺-ATPase, 76
- Circulation, local, hormone control of, 217
- Cocaine injection
- concurrent schedules (monkey), 367
 - dose variations under variable-interval procedures, 367
 - drugs and dosages, 368
 - independent concurrent schedules, 368
 - non-independent concurrent schedules, 376

 - reinforcers (monkey, man), 511
 - schedule-induction situation as model for reinforcing effects of, 460
- Electrolyte, hormonal control of distribution and transport, 230
- Environment
 - determinant of drug-taking behavior, 296
 - factors affecting behavior control, drug effects and, 429
 - variable in, affecting drug preference (monkey), 343
- Enzymes, catechol-forming, use of COMT in study of, 142
- Enzyme preparations, COMT activity study, 139
- Estrogen
 - cellular transport of, 263
 - effects on
 - amino acid uptake and distribution in uterine tissue, 254
 - metabolism, 248
 - nucleic acid precursors in uterus and vagina, 256
 - nucleotide pools, 258
 - nucleotide synthesis, 259
 - RNA metabolism, 257
- Ethacrynic acid, effects on Na⁺, K⁺-ATPase, 69
- Ethanol
 - effects on Na⁺, K⁺-ATPase, 79
 - elevation in blood, relation to physical dependence, 451
 - enhancement of schedule-induced polydipsia by saccharin, 452
 - initiation of drinking by
 - access to solid food, 468
 - exposure to ethanol, 469
 - schedule-induced polydipsia, 465
 - other fluids and, choice in dependent animals, 453

- Ethanol**—continued
 positive reinforcer, function of schedule-induced polydipsia in establishment of, 465
 schedule-induced physical dependence, 449
 schedule induction as method for producing physical dependence, 450
Etonitazene, positive reinforcer, 484
- Falk, John L., and Herman H. Samson**. Schedule-induced physical dependence on ethanol, 449
Flavonoids, COMT inhibitor, 166
Food
 comparison with drugs as reinforcers, 385
 naloxone and methadone effects on choice between heroin and, 357
 solid, initiation of ethanol drinking by access to, 468
 Food pellets, independently delivered, and schedule-induced licking, 481
Fusidic acid, effects on Na^+ , K^+ -ATPase, 77
- Gallic acid**, COMT inhibitor, 162
Gill, C. A. *See* Holz and Gill, 437
