This review journal embraces all aspects of research addressing the study of disease states and the consequent development of therapeutic agents. It features developments in specific areas of medicinal research, including a total review of the history leading up to the introduction of a new pharmaceutical.

Recent and Forthcoming Articles

Fertility Control, M.J.K. Harper
Synthetic Analogues for the Study of GABA as a Neurotransmitter, G. Johnston and R. Allan
Carcinogenicity and Its Effect on Research Programs, R.J. Van Ryzin
6-Ketomorphinans and Their Analgetic Properties, A. Brozzi and H. Schmidhammer
Human Interferon, S. Pestka
Piroxicam and Other Antiinflammatory Oxicams, J.G. Lombardino and E.H. Wiseman
Angiotensin Converting Enzyme Inhibitors: Medicinal Chemistry and Biological Actions, M.A. Ondetti and E.W. Petrillo, Jr.
Theoretical Approaches to Drug Design and Biological Activity, P.P. Mager
Recent Synthetic Anticoccidial Agents, Y. Morisawa
Central Actions of Nicotine, M.D. Aceto and B.R. Martin
An Analysis of the Stereoregular Structure-Activity Relationships of C-Methyl Derivatives of the Reversed Ester of Meperidine, A.F. Casy
Clozapin, E.J. Glamkowski
The Role of Toxicology in Drug Research and Development, V.M. Traina
Clinical Application of Platelet Inhibitors in Vascular Diseases, W.W. Fields
Glycolysis Regulation in Normal and Cancer Cells, H. Glossmann and E. Eigenbroth
Naloxone and Naltrexone, M.S. Gold

Tap into the broadest international coverage of the most rapidly growing branch of biological science

The Journal of Neuroscience
the Official Journal of the Society for Neuroscience

You need The Journal of Neuroscience NOW, because there's no better way to keep up with crucial advances that affect YOUR work.

You need its interdisciplinary coverage, its scouting of findings in all areas of neuroscience. You'll appreciate the way it mirrors the objectives of the North American Society for Neuroscience, as well as the Societies in Europe and Japan. And the way it keeps you absolutely up-to-date, no matter where significant breakthroughs occur.

Here's a sampling of recent* articles:
- Morphology and Synaptic Connections of Ultrafine Primary Axons in Lamina I of the Spinal Dorsal Horn: Candidates for the Terminal Axonal Arbors of Primary Neurons with Unmyelinated (C) Axons
- In Vitro Resetting of the Circadian Clock in the Aplysia Eye
- Rohon-Beard Neurons Arise from a Substitute Ancestral Cell after Removal of the Cell from Which They Normally Arise in the 16-Cell Frog Embryo
- Postnatal Development of Dopaminergic Neurons in the Rabbit Retina
- Brain Peptidase with a Unique Neuronal Localization: The Histochemical Distribution of Dipeptidyl—aminopeptidase II
- Developmental Stage-specific Changes in Lectin Binding to Mouse Cerebellar Cells In Vitro
- The Laminar Origin and Distribution of the Crossed Tectoreticular Pathways

*from the August and October 1981 issues.

Please sign me up for a year's subscription to The Journal of Neuroscience, starting in January, 1982.
- Institutional: $230.00
- Discount Individual: $60.00 (With Institutional subscription).
