PHARMACOLOGICAL REVIEWS

A Publication of the American Society for Pharmacology and Experimental Therapeutics

March 2007 Volume 59, Number 1

| Editor's Note | 1 |
|---|-----|
| PharmGKB Update PharmGKB Submission Update: IX. ADRB1 Gene Summary Michael A. Pacanowski and Julie A. Johnson | 2 |
| IUPHAR Nomenclature Report International Union of Basic and Clinical Pharmacology. LXVII. Recommendations for the Recognition and Nomenclature of G Protein-Coupled Receptor Heteromultimers Jean-Philippe Pin, Richard Neubig, Michel Bouvier, Lakshmi Devi, Marta Filizola, Jonathan A. Javitch, Martin J. Lohse, Graeme Milligan, Krzysztof Palczewski, Marc Parmentier, and Michael Spedding | 5 |
| Review Articles Emerging Roles for Ubiquitin and Protein Degradation in Neuronal Function Jason J. Yi and Michael D. Ehlers | 14 |
| Biomarkers in the Prevention and Treatment of Atherosclerosis: Need, Validation, and Future James H. Revkin, Charles L. Shear, Hubert G. Pouleur, Steven W. Ryder, and David G. Orloff | 40 |
| Interaction of Endothelial Nitric Oxide and Angiotensin in the Circulation Noboru Toda, Kazuhide Ayajiki, and Tomio Okamura | 54 |
| The Endomorphin System and Its Evolving Neurophysiological Role Jakub Fichna, Anna Janecka, Jean Costentin, and Jean-Claude do Rego | 88 |
| Erratum Correction to "Theoretical Basis, Experimental Design, and Computerized Simulation of Synergism and Antagonism in Drug-Combination Studies" | 124 |

About the cover: The UPS. Ubiquitin (Ub) is activated in an ATP-dependent reaction by the E1 ubiquitin-activating enzyme and appended to target proteins by the successive action of E2 ubiquitin-conjugating enzymes, E3 ubiquitin ligases, and E4 chain elongation factors. See the article by Yi and Ehlers on page 14 of this issue.
