

## INDEX

- Acetylcholine-like substances, 595
- Adrenaline, *see* Catecholamines; Epinephrine
- Ahlquist, R. P., 441
- Alkylating agents, 799
- Alkyltin, *see* Tin compounds
- Amanita phalloides*, chemistry and toxicology of toxins, 87
- Amine oxidases, *see* Catecholamines
- p*-Aminohippurate, diuretic effect, 126
- Anticancer agents, physiological disposition, 743
- Antifertility substances, 135
- Antihypertensive drugs, effects on cerebral circulation, 67
- Armstrong, M. D. and McMillan, A., 394
- Axelrod, J., 402
- Barnes, J. M. and Stoner, H. B. The toxicology of tin compounds, 211
- Bile formation, 109
- Blaschko, H., 307
- Blockade, adrenergic, *see* Catecholamines
- Blood-brain barrier, permeability to cholinesterase inhibitors, 603
- Bowman, R. L., 256
- Brain, effect of cholinesterase inhibitors, 604  
*see also* Blood-brain barrier; Cerebral circulation; Catecholamines
- Brodie, B. B., Spector, S. and Shore, P. A., 548
- Calcium, in cardiac muscle, 193
- Cancer, *see* Anticancer agents
- Cardiac glycoside action, 173
- Carries-inhibiting agents, 705
- Carlsson, A., 300, 490
- Catecholamines, symposium on, 237  
actions, at cellular and subcellular sites, 429, 441, 443, 462, 464, 465, 466, 469  
actions, central, 483, 490, 494, 548, 565  
amine oxidases, role in destruction, 387  
assay, *see* measurement  
bioassay procedures, 241  
biochemical effects, 469; *see also* actions  
biosynthesis, 307, 317, 330, 350, 358, 361, 374  
blockade of, 443, 462  
brain, actions on, *see* actions, central  
brain, distribution in, *see* distribution  
central nervous system, action on, *see* actions, central  
central nervous system, distribution in, *see* distribution  
chemical methods, 252; *see also* measurement  
chromatograms, 249  
determination, *see* measurement  
disposition, 381, 387, 394, 402, 409, 416  
distribution in nervous system, 483, 490, 548  
dopa decarboxylase, inhibition, 330  
dopa decarboxylase, role in formation, 317, 330; *see also* biosynthesis  
dopamine, detection and assay, 300  
drugs, interactions with, 548; *see also* distribution  
effects, *see* actions  
ethylenediamine method, 278, 289; *see also* measurement  
excretion, *see* metabolism and disposition  
flake, liver, actions on, 465  
fluorescence, 256; *see also* measurement  
formation, 307, 358; *see also* biosynthesis  
heart, rat, actions on, 466  
measurement, 241, 249, 252, 256, 262, 269, 273, 276, 278, 289, 296, 300  
metabolism, 402, 409, 416; *see also* biosynthesis and disposition  
methods for determination, *see* measurement  
3-methoxy-4-hydroxy-D-mandelic acid, formation, 394  
muscle, effects on, 469; *see also* actions  
pheochromocytoma, metabolism with, 374  
phosphorylase, actions on, 464, 465, 466  
physical methods, 252; *see also* measurement  
receptors for, 429, 441, 443, 462  
release, 361  
storage, 361  
termination of physiological actions, 381  
trihydroxyindole method, 262, 269, 273, 276, 296, 300; *see also* measurement
- Central nervous system, action of drugs on, 39  
*see also* Catecholamines; Organophosphorus compounds
- Cerebral circulation, effect of drugs, 18  
regulation, 9  
techniques of observation, 3

- Chemical warfare agents, *see* Organophosphorus compounds
- $\beta$ -Chloroethyl derivatives, 799
- Choleretics, 126
- Cholinesterase inhibitors, 567
- Clark, W. G., 330
- Coenzyme analogs, 788
- Cohen, G., 269
- Colchicine, 817
- Crout, J. R., 296
- Dental caries, *see* Caries-inhibiting agents
- Dialkyltins, *see* Tin compounds
- Dopa decarboxylase, *see* Catecholamines
- Dopamine, *see* Catecholamines
- Ellis, S., 469
- Elmadjian, F., 409
- Enzymes, inhibition, *see* Cholinesterase inhibitors
- Epinephrine, effect on cerebral circulation, 52; *see also* Catecholamines
- Ethylenediamine method, *see* Catecholamines
- Ethyleneimine derivatives, 805
- Euler, U. S. von, 262
- Fluke, liver, *see* Catecholamines
- Fungicides, ineffectiveness of tin compounds, 213
- Furchgott, R. F., 429
- Gaddum, J. H., 241
- Glutamine analogs, 783
- Glycogen depletion, in amanitin poisoning, 102
- Glycosides, cardiac, 173
- Goodall, McC., 416
- Hagen, P., 361
- Hajdu, Stephen and Leonard, Edward. The cellular basis of cardiac glycoside action, 173
- Haugaard, N., Kukovetz, W. R. and Hess, M. E., 466
- Heart, *see* Catecholamines; Glycosides, cardiac
- Hess, M. E., *see* Haugaard, N.
- Holmstedt, Bo. Pharmacology of organophosphorus cholinesterase inhibitors, 567
- Holtz, P., 317
- Hormones, effects on cerebral circulation, 69; on fertility, *see* Antifertility substances
- 5-Hydroxytryptamine, *see* Catecholamines
- Insecticides, tin compounds in, 214
- Ions, in normal muscle, 181
- Jackson, H. Antifertility substances, 135
- Kety, S. S., 565
- Kidney, urine formation, 109
- Kirshner, N., 350
- Koelle, G. B., 381
- Krayer, O., 235
- Kukovetz, W. R., *see* Haugaard, N.
- Leeper, L. C., 358
- Leonard, Edward, *see* Hajdu, Stephen, 173
- Liver, bile formation, 109
- McMillan, A., *see* Armstrong, M. D.
- Malathion poisoning, 627
- Mandel, H. George. The physiological disposition of some anticancer agents, 743
- Manger, W. M., 289
- Mansour, T. E., 465
- Membrane potential, 183
- 3-Methoxy-4-hydroxy-D-mandelic acid, *see* Catecholamines
- Muscle, cardiac, 173; *see also* Catecholamines
- Mushroom poisoning, 87
- Myasthenia gravis, management with cholinesterase inhibitors, 618
- Myleran and "Half Myleran", 810
- Nickerson, M., 443
- Noradrenaline, *see* Catecholamines
- Norepinephrine, *see* Catecholamines
- Organic anions, in urine and bile, 109
- Organophosphorus compounds, 567
- cardiovascular effects, 609
- chemistry, 569
- effects *in vivo*, 595
- effects on airway resistance, 623
- CNS, 603
- eye, 622
- glands, 621
- intestinal tract, 620
- muscular transmission, 612
- therapy in poisoning by, 630
- toxicological effects, 623
- Ovogenesis, 147
- Phalloidin, 90
- Phalloin, 93
- Pheochromocytoma, *see* Catecholamines
- Phosphorylase, *see* Catecholamines
- Phosphorylphosphatases, 587
- Placebos, pharmacology, 689
- Podophyllin and podophyllotoxin, 816
- Potassium, in cardiac muscle, 188
- Powell, C. E., *see* Slater, I. H.
- Price, H. L., 273
- Purine analogs, 746
- Pyrimidine analogs, 771

- Rall, T. W. and Sutherland, E. W., Jr., 464  
Receptors, adrenergic, *see* Catecholamines  
Renal tubular transport, 110  
Rothballer, A. B., 494  
Serotonin, *see* Catecholamines  
Shaw, James, H., Caries-inhibiting agents, 705  
Shore, P. A., 276, *see* Brodie, B. B.
