

CONTENTS

No. 1, Part 1, March 1966

Second Symposium on Catecholamines, Milan, Italy, July 4-9, 1965..... 1-804

No. 1, Part 2, March 1966

Mechanisms of chemical carcinogenesis: Nature of proximate carcinogens and interactions with macromolecules. ELIZABETH C. MILLER AND JAMES A. MILLER... 805
Modification by drugs of synaptic mechanisms in autonomic ganglia. ROBERT L. VOLLE..... 839
Relationships between anthelmintic effects and biochemical and physiological mechanisms. HOWARD J. SAZ AND ERNEST BUEDING..... 871
Drugs used in motion sickness. A critical review of the methods available for the study of drugs of potential value in its treatment and of the information which has been derived by these methods. J. J. BRAND AND W. L. M. PERRY..... 895

No. 2, June 1966

Dopamine (3-hydroxytyramine) and brain function. OLEH HORNYKIEWICZ..... 925
Behavioral and electroencephalographic effects of atropine and related compounds. V. G. LONGO..... 965
Tetrodotoxin, saxitoxin and their significance in the study of excitation phenomena. C. Y. KAO..... 997

No. 3, September 1966

The mutual disposition of cholinoreceptors of locomotor muscles, and the changes in their disposition in the course of evolution. N. V. KHROMOV-BORISOV AND M. J. MICHELSON..... 1051
The biochemical production of ferrihemoglobin-forming derivatives from aromatic amines, and mechanisms of ferrihemoglobin formation. MANFRED KIESE..... 1091
Erratum for the Second Symposium on Catecholamines..... 1162

No. 4, December 1966

Histaminase and related amine oxidases. F. BUFFONI..... 1163
Metabolism of norepinephrine in the central nervous system. JACQUES GLOWINSKI AND ROSS J. BALDESSARINI..... 1201
Index..... 1239

CONTENTS

Twenty years of noradrenaline. U. S. VON EULER.....	29
---	----

SECTION I

ENZYMOLGY

FIRST SESSION. CHAIRMAN: H. BLASCHKO

A. Introductory remarks. H. BLASCHKO.....	39
B. Tyrosine hydroxylase. SIDNEY UDENFRIEND.....	43
C. Dopa decarboxylase: substrates, coenzyme, inhibitors. THEODORE L. SOURKES.....	53
D. Coenzymes and hydroxylases: ascorbate and dopamine- β -hydroxylase; tetrahydropteridines and phenylalanine and tyrosine hydroxylases. SEYMOUR KAUFMAN.....	61
E. Enzymic studies on the mechanism of double hydroxylation. OSAMU HAYAISHI.....	71
F. Inhibition of norepinephrine biosynthesis at the dopamine- β -hydroxyla- tion stage. M. GOLDSTEIN.....	77
G. Summary of discussion and commentary. N. KIRSHNER.....	83

SECOND SESSION. CHAIRMAN: P. HOLTZ

H. Introductory remarks. P. HOLTZ.....	85
I. Biosynthesis of catecholamines in insects. CONSTANTIN E. SEKERIS AND PETER KARLSON.....	89
J. Methylation reactions in the formation and metabolism of catechol- amines and other biogenic amines. JULIUS AXELROD.....	95
K. Monoamine oxidases. V. Z. GORKIN.....	115
L. Monoamine oxidase inhibitors. A. PLETSCHER.....	121
M. Steric effects in catecholamine interactions with enzymes and receptors. B. BELLEAU.....	131
N. Summary of discussion and commentary. E. A. ZELLER.....	141

SECTION II

METABOLIC EFFECTS OF CATECHOLAMINES

CARBOHYDRATE METABOLISM. CHAIRMAN: C. CORI

A. The role of cyclic 3',5'-AMP in responses to catecholamines and other hormones. EARL W. SUTHERLAND AND G. ALAN ROBISON.....	145
B. Activation of skeletal muscle phosphorylase. EDWIN G. KREBS, ROBERT J. DELANGE, ROBERT G. KEMP AND W. DIXON RILEY.....	163
C. Factors influencing activation of phosphofructokinase. TAG E. MAN- SOUR.....	173
D. The stimulation of gluconeogenesis from lactate by epinephrine, glu-	

- cagon, and cyclic 3',5'-adenylate in the perfused rat liver. J. H. EXTON AND C. R. PARK 181
- E. The activation of glycolysis in frog sartorius muscle by epinephrine. ERNST HELMREICH AND CARL F. CORI 189
- F. The influence of catecholamines on heart function and phosphorylase activity. NIELS HAUGAARD AND MARILYN E. HESS 197
- G. Kinetic studies of epinephrine effects in the perfused rat heart. JOHN R. WILLIAMSON 205
- H. Summary of discussion and commentary. E. BUEDING 211

LIPID METABOLISM. CHAIRMAN: M. VAUGHAN

- I. Introductory remarks. M. VAUGHAN 215
- J. Catecholamine stimulation of fat mobilization and its metabolic consequences. DANIEL STEINBERG 217
- K. Cyclic 3',5'-AMP and the lipolytic effects of hormones on adipose tissue. R. W. BUTCHER 237
- L. Blood and tissue changes induced by norepinephrine-stimulated mobilization of free fatty acid. L. A. CARLSON 241
- M. Effect of drugs on mobilization of free fatty acid. S. GARATTINI AND A. BIZZI 243
- N. Summary of discussion and commentary. T. BRODY 253

PHYSIOLOGICAL INTERRELATIONSHIPS. CHAIRMAN: LENNART LUNDHOLM

- O. Introductory remarks. LENNART LUNDHOLM, ELLA MOHME-LUNDHOLM AND NILS SVEDMYR 255
- P. Interrelationships of catecholamines with other endocrine systems. B. B. BRODIE, J. I. DAVIES, S. HYNIE, G. KRISHNA AND B. WEISS 273
- Q. The role of catecholamines in cold adaptation. LOREN D. CARLSON 291
- R. Effects of glucose deprivation on the sympathetic outflow to the adrenal medulla and adipose tissue. ALAN GOLDFIEN 303
- S. Summary of discussion and commentary. Z. M. BACQ 313

SECTION III

MEASUREMENT AND DETECTION OF CATECHOLAMINES AND RELATED COMPOUNDS

CHAIRMAN: MARTHE VOGT

- A. Introductory remarks. MARTHE VOGT 315
- B. The estimation of catecholamines by biological assay. J. R. VANE 317
- C. Newer developments in catecholamine assay. JAN HÄGGENDAL 325
- D. The estimation of metanephrine, normetanephrine, and 3,4-dihydroxymandelic acid in urine. H. WEIL-MALHERBE AND ELIZABETH R. B. SMITH 331
- E. The measurement of 4-hydroxy-3-methoxymandelic acid and homovanillic acid. M. SANDLER AND C. R. J. RUTHVEN 343
- F. Methodology of fluorescence microscopy of catecholamines. CH. OWMAN 351

- G. Demonstration of catecholamines and cholinesterases in the same section. OLAVI ERÄNKÖ..... 353
- H. Summary of discussion and commentary. G. B. KOELLE..... 359

SECTION IV

PROPERTIES OF ADRENERGIC TISSUES

CHAIRMAN: U. S. VON EULER

- A. Introductory remarks. U. S. VON EULER..... 365
- B. The localization of monoaminergic blood-brain barrier mechanisms.
A. BERTLER, B. FALCK, CH. OWMAN AND E. ROSENGRENN..... 369
- C. Electron microscopy of sympathetic tissues. MARY A. GRILLO..... 387
- D. Catecholamine storage particles in the central nervous system. V. P. WHITTAKER..... 401
- E. Adrenergic endings and vesicles isolated from brain. EDUARDO DE ROBERTIS..... 413
- F. Storage particles in noradrenergic tissues. LENNART STJÄRNE..... 425
- G. Medullary particles. HANS-JOACHIM SCHÜMANN..... 433
- H. Storage of norepinephrine in sympathetic nerves. LINCOLN T. POTTER... 439
- I. Chromaffin tissue. P. BANKS AND H. BLASCHKO..... 453
- J. Summary of discussion and commentary. E. W. MAYNERT..... 457

SECTION V

ADRENERGIC TRANSMISSION

CHAIRMAN: J. H. BURN

- A. Introductory remarks. J. H. BURN..... 459
- B. The mechanism of release of catecholamines from the adrenal medulla.
W. W. DOUGLAS..... 471
- C. Junction potentials at adrenergic synapses. G. BURNSTOCK AND MOLLIE E. HOLMAN..... 481
- D. Calcium and the relaxant effect of isoproterenol in the depolarized rat uterus. H. O. SCHILD..... 495
- E. Pharmacological characterization of adrenergic receptors. NEIL C. MORAN..... 503
- F. Biochemical aspects of release of norepinephrine and other amines from sympathetic nerve endings. IRWIN J. KOPIN..... 513
- G. The mechanism of uptake of norepinephrine. ELWOOD TITUS AND HANS J. DENGLER..... 525
- H. Summary of discussion and commentary. J. S. GILLESPIE..... 537

SECTION VI

MODIFICATION OF SYMPATHETIC FUNCTION

CHAIRMAN: F. F. SHIDEMAN

- A. Pharmacological depletion of catecholamine stores. ARVID CARLSSON... 541
- B. Indirectly acting sympathomimetic amines. E. MUSCHOLL..... 551

- C. The mechanism of norepinephrine depletion by reserpine, metaraminol and related agents. The role of monoamine oxidase. P. A. SHORE . . . 561
- D. Methyldopa and adrenergic nerve function. CLEMENT A. STONE AND CURT C. PORTER 569
- E. Interactions of drugs with adrenergic neurons. E. COSTA, D. J. BOULLIN, W. HAMMER, W. VOGEL AND B. B. BRODIE 577
- F. Inhibitors of endogenous catecholamine biosynthesis. SYDNEY SPECTOR . . 599
- G. Surgical sympathectomy and adrenergic function. THEODORE COOPER . . 611
- H. Immunosympathectomy. RITA LEVI-MONTALCINI AND PIERO U. ANGELETTI 619
- I. Mechanisms of supersensitivity and subsensitivity to sympathomimetic amines. U. TRENDELENBURG 629
- J. Summary of discussion and commentary. R. F. FURCHGOTT 641

SECTION VII

CATECHOLAMINES AND THE CIRCULATORY SYSTEM

CHAIRMAN: A. SJOERDSMA

- A. Chemistry and pharmacology of catecholamine-secreting tumors. WILFRED VON STUDNITZ 645
- B. Pheochromocytoma. J. RICHARD CROUT 651
- C. Catecholamine-producing neural tumors other than pheochromocytoma. HANS KÄSER 659
- D. Catecholamines and hypertension. W. S. PEART 667
- E. Catecholamine-drug interactions in man. ALBERT SJOERDSMA 673
- F. Sympathetic activity and neurotransmitter depletion in congestive heart failure. CHARLES A. CHIDSEY AND EUGENE BRAUNWALD 685
- G. Adrenergic blockade in cardiovascular disease. A. C. DORNHORST 701
- H. Cardiovascular effects of monoamine oxidase inhibitors. B. NIKO-DIJEVIĆ, E. GLAVAŠ AND M. POLENAKOVIĆ 705
- I. Summary of discussion and commentary. S. E. GITLOW 707

SECTION VIII

ADRENERGIC MECHANISMS IN THE NERVOUS SYSTEM

CHAIRMAN: W. FELDBERG

- A. Introductory remarks. W. FELDBERG 713
- B. Central adrenergic synapses. G. C. SALMOIRAGHI 717
- C. Demonstration and mapping of central neurons containing dopamine, noradrenaline, and 5-hydroxytryptamine and their reactions to psychopharmaca. N.-Å. HILLARP, KJELL FUXE AND ANNICA DAHLSTRÖM 727
- D. New possibilities for adrenergic modulation of ganglionic transmission. KARL-AXEL NORBERG AND FOLKE SJÖQVIST 743
- E. Behavioural and electrophysiological effects of catecholamines. E. MARLEY 753

F. Possible role of brain dopamine. ÅKE BERTLER AND EVALD ROSENGREN .	769
G. Effects of drugs on the disposition of H ³ -norepinephrine in the rat brain. J. GLOWINSKI AND J. AXELROD	775
H. Catecholamines in neuropsychiatric states. SEYMOUR S. KETY	787
I. Adrenergic activation by anticholinesterases. V. VARAGIĆ AND M. KRSTIĆ	799
J. Summary of discussion and commentary. M. NICKERSON	801
