CONTENTS

No. 1, MARCH 1975
Suggestions to Contributors .......................................................... 1
The Sodium-Potassium Adenosine Triphosphatase: Pharmacological, Physiological and 
Biochemical Aspects. ARNOLD SCHWARTZ, GEORGE E. LINDENMAYER AND JULIUS C. ALLEN 3

No. 2, JUNE 1975
Catechol-O-Methyl Transferase. Pharmacological Aspects and Physiological Role. HANS C. 
GULDBERG AND CHARLES A. MARSDEN ......................................... 135
Accessory Reproductive Organs in Mammals: Control of Cell and Tissue Transport by Sex 
Hormones. EUGENE SPAZIANI .......................................................... 207

No. 3, SEPTEMBER 1975
Symposium on Control of Drug-Taking Behavior by Schedules of Reinforcement, Part 1
General Introduction: Control of Drug-taking Behavior by Schedules of Reinforcement. R. 
T. KELLEHER AND S. R. GOLDBERG .................................................. 291
I. Drug Injections as Events That Control Behavior
Introduction: The Control of Behavior by Consequent Drug Injections. W. H. MORSE .... 301
Characteristics of Behavior Controlled by Scheduled Injections of Drugs. R. T. KELLEHER . 307
Stimuli Associated with Drug Injections as Events That Control Behavior. S. R. GOLDBERG . 325
II. Complex Schedules of Drug Injection
Introduction: Complex Schedules of Drug Injection. R. T. KELLEHER AND S. R. GOLDBERG ... 341
Pharmacological and Environmental Variables Affecting Drug Preference in Rhesus Mon- 
keys. C. E. JOHANSON .................................................................. 343
Discrete-trial Choice Procedure: Effects of Naloxone and Methadone on Choice between Food 
and Heroin. R. R. GRIFFITHS, R. M. WURSTER AND J. V. BRADY .......... 357
Concurrent Schedules of Cocaine Injection in Rhesus Monkeys: Dose Variations under 
Independent and Non-independent Variable-interval Procedures. C. IGNAUER, M. E. 
LLEWELLYN AND J. H. WOODS ..................................................... 367
Drug Effects and Concurrent Performances. A. C. CATANIA .................................. 385
III. Schedules of Termination of Drug Injections
KELLEHER ................................................................................. 395
Naloxone as a Negative Reinforcer in Rhesus Monkeys: Effects of Dose, Schedule, and 
Narcotic Regimen. D. A. DOWNS AND J. H. WOODS ............................ 397
Termination of a Schedule Complex Associated with Intravenous Injections of Nalorphine in 
Psychotropic Drugs as Negative Reinforcers. F. HOFFMEISTER AND W. WUTTKE .......... 419
Drug Effects and the Environmental Control of Behavior. J. W. MCKEARNLY ............ 429
Drug Injections as Negative Reinforcers. W. C. HOLT AND C. A. GILL ................. 437

No. 4, DECEMBER 1975
Symposium, Part 2
IV. Schedule-induced Polydipsia and Oral Intake of Drugs
Schedule-induced Physical Dependence on Ethanol. J. L. FALK AND H. H. SAMSON .......... 449
The Function of Schedule-induced Polydipsia in Establishing Ethanol as a Positive 
Reinforcer. R. A. MEBACH ............................................................ 465
Schedule-induced Narcotic Ingestion. J. D. LEANDER AND D. E. McMIILLAN ............. 475
Schedule-induced Polydipsia and Oral Intake of Drugs. N. K. MELLO ......................... 489
CONTENTS

V. Behavioral Factors in Human Drug Abuse

Introduction: Behavioral Factors in Human Drug Abuse. N. A. Krasnegor .................................. 499
Some Methodological Problems in Assessing Dependence-producing Properties of Drugs in
Animals. T. Yanagita ................................................................. 503
Drugs as Reinforcers in Monkey and Man. C. R. Schuster .................................................... 511
Experimental Human Drug Self-administration: Methodology and Application to the Study
of Sedative Abuse. G. Engelow, R. Griffiths and I. Liebson .................................................. 523
Experimental Analysis of Conditioning Factors in Human Narcotic Addiction. C. P.
O'Brien ...................................................................................... 533
Are the Techniques and Results of Studies of Self-administration of Drugs Useful in Other
Areas of Psychobiology. P. B. DeWes .............................................. 545
Index ......................................................................................... 549
