

INDEX

- Acetic acid, during alcohol metabolism, 122
- Acetylcholine, 263
effect on peripheral nerve, 194
synthesis, inhibitors of, effect on peripheral nerve, 197
- Acetaldehyde
metabolism, 120
- Acids, ionization of, 139
- Aconitine, effect on cardiac arrhythmias, 56
- Adenylic acid derivatives, effect on kidney blood circulation, 268
- Adrenal cortical disorders, 272
- Adrenalin, 264
effect on blood circulation through kidney, 266
role in development of cardiac arrhythmias, 47
- Albert, Adrien: Ionization, pH, and biological activity, 136
- Alcohol dehydrogenase, 123
in alcohol metabolism, 129
- Alcohol, effect on peripheral nerve, 190
ethyl, effect on liver, 21
metabolism of,
metabolism, 107
biochemical processes of, 123
effect of alanine on, 116
effect of carbohydrates on, 114
effect of drugs on, 117
effect of general metabolism on, 114
effect of insulin on, 115
effect of pyruvate on, 116
effect of starvation on, 114
effect of vitamin deficiencies on, 117
in intact organisms, 110
individual variations, 113
influence of metabolic processes on, 114
intermediary products in, 120
sites of, in organism, 118
- Alcoholaemic curve, slope and shape, 110
- Amidines, as inhibitors of amine oxidase, 434
- Amine metabolism, 415
early work in, 416
in the living organism, 437
- Amine oxidase, 415
action of lytic agents on, 418
alkaloid synthesis, 422
amidines as inhibitors of, 434
and histaminase, 427
and partial pressure of oxygen, 428
and riboflavin deficiency, 426
as detoxicating agent, 441
biological significance, 441
competitive inhibitors, 433
distribution of, 418
distribution, in vertebrates, 420
intracellular, 418
effect with amino group substitutions, 432
homogeneity, 424
in invertebrates, 422
in plants, 422
in regenerating rat liver, 419
in the living organism, 437
inhibitors of, 436
oxidative deamination catalysed by, 425
preparations of, 424
properties of, 424
substrate specificity, 428
- Amines, not normally found in body, metabolism of, 438
oxidation of, in plants, 424
sympathomimetic, 441
in invertebrates, 441
in vertebrates, 443
- Analgesics, effect on peripheral nerve, 193
- Anesthetics, effect on peripheral nerve, 185
- Anions, effect on peripheral nerve, 204
- Anoxia, effect on cardiac arrhythmias, 49
- Antabuse, effect on alcohol metabolism, 117
- Antibiotics, effect on peripheral nerve, 206
- Anticholinesterases, effect on peripheral nerve, 194
- Anticonvulsants, effect on peripheral nerve, 192
- Antidiuretic substances, 254
acting directly on cells of renal tubules, 256
action of, on tubules, 258
affecting blood circulation through kidney, 265
assay, 254
concentration necessary to produce anti-diuresis, 260
detection, 254
disappearance from blood, 261
effect on absorption of water from alimentary canal, 256
effect on ureters, 256
form and composition, 261
found in pregnancy, 273

- Antidiuretic substances—*Continued*
 rate of release from, posterior lobe, 260
 role of renal nerves in action of, 258
 site of action, in central nervous system, 262
 in kidney, 257
- Antihistaminics, effect on peripheral nerve, 198
- Antimony, dosage schedule, 87
- Arrhythmias, cardiac, action of substances preventing or stopping, 66
 circus movement and, 58
 ectopic focus and, 58
 effect of aconitine on, 57
 effect of anoxia on, 49
 effect of barium chloride on, 54
 effect of chloroform on, 50
 effect of cyclopropane on, 50
 effect of myocardial damage on, 49
 effect of veratrum on, 57
 electrical stimulation of, 60
 influence of arterial blood pressure changes on, 43
 role of adrenalin in development of, 47
 supernormality and membrane potentials and, 57
 experimental cardiac, and quinidine-like drugs, 43
- Arsenic, dosage schedule, 87
 effect on liver, 26
- Azo compounds, effect on liver, 25
- Barbiturates, effect on peripheral nerve, 190
- Barium chloride, effect on cardiac arrhythmias, 54
- Bases, ionization of, 139
- Benzene, effect on liver, 22
- Blaschko, H.: Amine oxidase and amine metabolism, 415
- Blood pressure changes, arterial, influence on cardiac arrhythmias, 43
- Bonds, ionic, and covalent bonds, 146
- Brain, alcohol metabolism in, 119
- Brombenzene, effect on liver, 23
- Cannabinols, effect on peripheral nerve, 193
- Carbamates, effect on peripheral nerve, 190
- Carbohydrate, and liver glycogen, 30
- Carbon dioxide, effect on peripheral nerve, 201
- Carbon tetrachloride, acute liver injury from, 3
 dietary factors effecting, 15
- Catalase, in alcohol metabolism, 125
- Cations, effect on peripheral nerve, 202
- Chemotherapeutic agents, dosage schedule, 85
- Chloroform, acute liver injury from, 2
 effect on cardiac arrhythmias, 50
 liver toxicity, dietary factors effecting, 11
- Choline, effect on fatty infiltration of liver, 9
 effect on liver toxicity of carbon tetrachloride, 17
 effect on liver toxicity of chloroform, 13
 effect on liver toxicity of ethylene dichloride 19,
- Cholinergic blocking agents, effect on peripheral nerve, 196
- Circus movement, cardiac arrhythmias and, 58
- Cirrhosis, from hepatotoxic agents, 4
- Corpuscles, blood, iron exchange between plasma and, 377
- Cyanamide, effect on alcohol metabolism, 117
- Cyclopropane, effect on cardiac arrhythmias, 50
- Dawes, G. S.: Experimental cardiac arrhythmias and quinidine-like drugs, 43
- DDT, effect on peripheral nerve, 205
- Decamethonium, *see also* Methonium compounds
 Decamethonium,
 actions in man, 232
 potency variation, 232
- Dehydrogenase, 127
- Diet, and hepatic fibrosis, 8
 and massive hepatic necrosis, 9
- Dietary effects, on liver, action mechanisms, 29
- Dietary factors, effect on liver toxicity of carbon tetrachloride, 15
 effect on liver toxicity of chloroform, 11
 hepatotoxic agents and, 11
 liver injury and, 8
