

MOVING?

To be sure of receiving every issue of your Journal, notify the publisher 60 days in advance. Supply: your old address; your new address; and the name of the journal to which you subscribe.

Journals sent to your former address will be destroyed unless you notify your postmaster that you will pay the forwarding postage.

You can replace missing journals only by purchasing duplicates from the publisher—at the regular price of single issues—and our stock of overcopies may be exhausted by that time.

So—well before moving day—notify:

Sixth edition of a medical classic

BEST and TAYLOR

PHYSIOLOGICAL BASIS OF MEDICAL PRACTICE

Thoroughly revised edition of a book reviewers have praised as . . . "a must for every doctor's library" (*New York State Journal of Medicine*) . . . "The epitome—the *ne plus ultra*—of physiology texts" (*Chicago Medical School Quarterly*) . . . "an impressive feat of skill and scholarship" (*Bulletin of the Johns Hopkins Hospital*) . . . "a book unequalled in the English language" (*Journal of the Irish Medical Association*) . . . "a reference book of exceptional merit" (*Quarterly Review of Biology*) . . . "a classic text on physiology" (*Illinois Medical Journal*).

Now in its 32nd printing, Best and Taylor has been translated into Spanish and Portuguese. Over 200,000 people have bought its earlier editions for its remarkable correlation of clinical application with physiological principles.

1370 pages over 600 figs. \$12.00

Good Books to Relax With

▶ You doubtless know your Hippocrates and have a copy on your "cultural" shelf. Hippocrates is about 2400 years back. There is a still older classic worthy of a place alongside him:

THE YELLOW EMPEROR'S CLASSIC OF INTERNAL MEDICINE

The Yellow Emperor ruled in China 4000 years ago and left a sheaf of recorded conversations of which we have here the first 34 chapters carefully translated from the Chinese by ILZA VEITH, Ph.D. Thus the English reader may now, for the first time, enjoy medical discussions of a far distant land, a far distant people, and of a far different medical tradition. "Fascinating reading", says J. A. M. A.; "a valuable addition to medical lore."

6-7/8 x 10. xix + 253 pp. 26 illustrations. \$5.00

▶ Doctors are more than medicine men; they are probably men of stature in their several communities and so they are called upon to make speeches. Ever been stuck? You could do with a copy of

THE ART OF ELOQUENCE

It shows you how to plan a speech, what to wear, what gestures to use (and what to avoid) how to overcome stage fright, how to judge audience reaction, how to behave in front of a mike or a TV camera. There is even a chapter on how to get elected to public office. The book is written by a couple of men whose combined experience in public speaking runs more than a half-century: one is THEODORE R. McKELDIN, Republican governor of Democratic Maryland, the man who nominated President Eisenhower at Chicago in 1952 (the nominating speech is included in the book). The other is Dr. JOHN C. KRANTZ, JR., Professor of Pharmacology at the University of Maryland, and in wide demand for his powers of making a speech a matter of keen enjoyment for the listener.

5-3/4 x 8-1/2. x + 245 pp. \$3.00.

▶ You are interested in medicine or you wouldn't be reading this. Are you interested in doctors? What they do, what they think about themselves and their jobs, their relation to their patients, and to the community, how they get along economically speaking, group practice, office personnel and lay-out—it's all set forth with many other pertinent items in

THE DOCTOR: HIS CAREER, HIS BUSINESS, HIS HUMAN RELATIONS

It's a behind-the-scenes review of the profession, written in fluent easy English by STANLEY R. TRUMAN, sometime president of the American Academy of General Practice. "If you don't read it you are missing something really good and fine" says California Academy.

6 x 9. vii + 151 pp. \$3.00.
